

## **Paul Durzan**

Vice President, Product Management  
Converged Data Center Infrastructure  
Hewlett Packard Enterprise

Paul Durzan is Vice President of Product Management, Converged Data Center Infrastructure (CDI). In his current role, Paul leads the Infrastructure and Orchestration Management Software team. His responsibilities include owning the product strategy and roadmap across CDI's Infrastructure and Orchestration Management Software, including HPE OneView, the HPE Composable Partner Ecosystem, and the software strategy for HyperConverged.

Paul has more than 15 years of IT experience in product management, sales, finance, product marketing and solutions development. He has successfully brought to market significant, market-changing technologies and solutions for leading technology companies and has successfully managed product portfolios with more than ten figures of revenue.

Prior to joining HP, Paul has held management positions at Sun Microsystems, Dell and Cisco. While at Cisco, Paul brought Cisco's servers to market as the Director of Product Management; and developed and drove Cisco Smart Solutions and the articulation of Cisco's SDN strategy. At Dell, Paul helped develop Dell's virtualization strategy while also acting as the product planner for various Dell server products. At Sun Microsystems, Paul was responsible for bringing Sun's new (at the time) multi-threaded architecture.

Paul holds a Bachelor's and Master's degree in Engineering and a Master's in Business Administration.
